

## OUR RANGE OF EMERGENCY AND RESCUE CHAMBERS

 MINE SHELT' AIR

 TUNNEL SHELT' AIR

 COAL MINE SHELT' AIR

### MINE SHELT' AIR

(6 to 32 people)

**STANDARD**

(Spacious design)

**COMPACT**

(Ideal for *digging* construction sites)

**NARROW**

(For *small spaces*)

**CUZTOMIZABLE RESCUE CHAMBER**

(Depending on your *needs*)

### TUNNEL SHELT' AIR

(6 to 32 people)

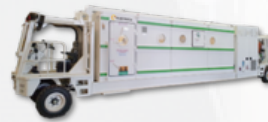

**TUNNEL MACHINES**

(Adapts to different manufacturers)

**RAIL / ROAD**

(Evolution on railway tracks)

**MSV**

(Vehicles Multi-Services)

**AD HOC**

(In *complex* situations)

### COAL MINE SHELT' AIR

(6 to 32 people)

**STANDARD**

(Spacious design)

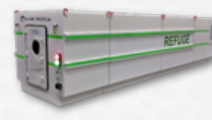

**NARROW**

(For *confined spaces*)

**COMPACT**

(*Digging* construction sites)

**LOW SEAM**

(For the veins at *low height*)

**CUZTOMIZABLE RESCUE CHAMBER**

(Depending on your *needs*)

## OTHER DESIGNS

**FIREPROOF**

**MENRIDER**

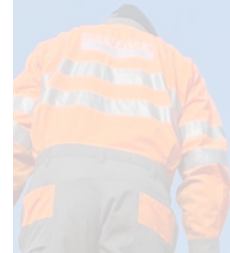

Personnel Transportation  
pressurized

**EMERGENCY VEHICLE  
ELECTRIC**

## EQUIPMENT

Chemical WC  
First aid kit  
Gas measurement  
Defibrillator  
Air Conditioning  
Scrubber  
Brancard

Monitor weather conditions  
in/out of chamber

Consistent with international guidelines  
for emergency shelters

Consolidate and protect operators  
in a secure location

Continually temper and illuminate  
the interior of the shelter to reduce  
stress and anxiety

Remove, Overpress and Oxygenate  
air volume in the shelter

Autonomy of  
36 hours and more

## WHAT ARE ITS ADVANTAGES?

- ✓ Unique air handling technology with CO/CO2 recycling for greater range
- ✓ Pressurized safety air lock equipped with an air trap to prevent contamination of the main chamber
- ✓ Robust design
- ✓ Monitoring the indoor environment and all shelter parameters with intelligent sensors
- ✓ Modular capacity and dimensions
- ✓ Increased mobility thanks to its chassis (SKID) and different lifting points (forks)
- ✓ Automated shelter management with touch screen
- ✓ Simple and intuitive operation
